Apprenticeships are the proven way to train your workforce. Apprenticeships can make your organisation more effective, productive and competitive by addressing your skills gaps directly, even in uncertain economic times.

You'll be working in a service technician type role, carrying out routine maintenance and basic repairs, as well as identifying and reporting faults.

On the Advanced Apprenticeship, you'll learn about more complex faults and how to identify and repair them using diagnostic equipment.

Delivery and Costs

The majority of the funded training is for 16 to 18 year olds. For those aged 19+ government funding is reduced and Employers are required to make a fee contribution.

One day a week will be spent at College doing practical tasks, learning necessary job theory and developing key employment skills. Other assessments take place completely in the workplace and the College comes to you.

As the Employer you be required to give your Apprentices an induction into their role and provide on-the-job training. You are also responsible for paying your Apprentice a wage (16-18 and for those aged 19 and over in their first year of apprenticeship programme £2.50 p/h; 19-20 in second year of apprenticeship programme £4.92 p/h; 21 and over in second year of apprenticeship programme £5.93 p/h) and agreeing to release the employee for their college commitments at scheduled times.

Course Duration

All Apprenticeships have a framework that has been developed specially for the relevant occupation. Our Level 2 Apprenticeship can take between 18 months and 2 years to complete.

Apprenticeship Framework

There are a number of elements to each Apprenticeship and this is called the framework. Each Apprenticeship framework has four main strands:

- **Main Aim** – This is an assessed qualification, designed to assess and judge the application of skills and knowledge to a competent level.
- **Technical element** - This is a taught qualification, designed to develop the essential skills and knowledge needed to be competent at the job role.
- **Functional/Key Skills element** - Generally the application of essential communication and numeracy skills applied to the job role.
- **Employment responsibilities and rights** - What is needed to comply with essential employment legislation to ensure fairness, equality and the essential health and safety of the workplace.

Apprenticeship (Level 2) is relevant to:

- Vehicle Technician
- Motor Vehicle Mechanic

Course Content

There are 6 mandatory units and 1 option unit:

- Ensure actions reduce risks to Health and Safety.
- Carry out routine vehicle maintenance.
- Remove and replace engine units and components.
- Remove and replace auxiliary electrical units and components.
- Remove and replace chassis units and components.
- Remove and replace vehicle transmission & driveline units and components.

Progression

Apprentices usually undertake the Apprenticeship at Level 2 first. When candidates have completed, most progress to the Advanced Apprenticeship Level 3.
